

dlhBOWLES Assists in Managing Supply Chain Risk During COVID-19

We're answering the call to help with the COVID-19 response with unparalleled urgency. dlhBOWLES is leveraging resources and decades of Automotive and Consumer Products manufacturing experience responding to demands for critical medical supplies. You can count on dlhBOWLES' quick response and expedited lead time for injection mold tools and assembly equipment, enabling rapid production.

To help reduce your supply chain risks, the dlhBOWLES team offers varying degrees of immediate support utilizing USA based facilities in Maryland and Ohio or our Reynosa Mexico plant.

Our Capabilities

- Injection Molding and tube extrusion of nearly all thermoplastics (excluding silicone), with access to an extensive network of tool shops
- "Lights out" injection molding using 33 to 330-ton presses
- 2 to 3.5-inch extruders
- 4ft to 8ft diameter index forming tables
- In-house injection mold tool and machine shops from our North American locations

Current Projects

dlhBOWLES is currently producing parts for the Ventec Life Systems VOCSN Ventilator in cooperation with GM and Ventec.

dlhBOWLES is supplying the 3M Versaflo™ respirator flow indicator tube assembly in cooperation with Ford and 3M.
